

# Excavations

We maintain strong relationships with local regulators and are well versed in state and tribal regulations concerning oil and gas releases. Our knowledge and experience allows us to complete the job as safely and efficiently as possible and minimize production losses for our clients' operations.

Excavation services include:

- Daily progress reports
- Site-specific health and safety plans
- Environmental oversight
- Soil removal, transport, and disposal
- Field screening and soil segregation
- Laboratory analysis of confirmation samples
- Prepare and submit waste manifests
- Backfilling and compaction
- Final report
- Site closure or remediation recommendations

Soil Removal, Transport, & Disposal

Soil Screening & Segregation
