WSP Smart® solutions integrate technology with physical assets to enhance the communities where we live, work, learn and play. Across the country, our team of scientists, data analysts, architects and planners bring their local knowledge, relationships, and experience to each project every day.

Through our industry expertise, resources and insights, we stay ahead of evolving marketplace trends and changing legislation to provide solutions for our clients that enhance existing assets while encouraging sustainable and fiscally responsible development.

WSP offers full intelligent infrastructure services, from advisory and persona creation, to the collection, measurement and analysis of data, detailed design, contract administration and asset management.

Our Future Ready® problem-solving approach allows us to see tomorrow’s challenges more clearly and design solutions for them today. It’s an approach that puts people at the centre of the experiences we design to help develop smart, connected infrastructure solutions in rural and urban communities.

- Improve the livelihood, safety, and quality of life for communities.
- Improve business environments, attract investments and make doing business easier.
- Support resiliency and sustainability initiatives, and increase footfall.
- Drive efficiency and maximize investments by extending the life of infrastructure assets.

WSP offers full intelligent infrastructure services, from advisory and persona creation, to the collection, measurement and analysis of data, detailed design, contract administration and asset management.

Our Future Ready® problem-solving approach allows us to see tomorrow’s challenges more clearly and design solutions for them today. It’s an approach that puts people at the centre of the experiences we design to help develop smart, connected infrastructure solutions in rural and urban communities.
