

Hydropower services – FERC dam safety

Harnessing the power of water

WSP USA offers comprehensive FERC dam safety program support, including FERC dam safety performance monitoring program and potential failure mode analysis (PFMA) services and facilitation. In addition, we assist clients in integrating the FERC risk-informed decision making process into their dam safety programs.

The hydropower team's senior leadership has 30+ years of experience working on hydropower projects under the FERC Dam Safety Guidelines and Criteria. Our skill and versatility enable us to plan, engineer and design, inspect, assess and monitor, repair and rehabilitate and otherwise support dam safety work.

SERVICES

- Development of owner's dam safety programs
- FERC independent consultant services (Part 12D safety inspections and reports)
- PFMA facilitator services and report preparation
- Preparation, review and updating of FERC dam safety surveillance and monitoring plans and dam safety surveillance and monitoring reports
- Preparation, review and updating of FERC supporting technical information documents
- Preparation and review of security plans, including rapid response and recovery plans
- Preparation, review and updating of emergency action plans (EAP), including GIS-based inundation maps
- EAP tabletop and functional exercise planning and facilitation, including joint exercises (multiple owners in a single river reach)
- Gate operations – evaluations of normal and emergency gate operations
- Detailed and general dam safety training for owner staff, including visual inspections, instrumentation, safety awareness, operations and EAPs
- Independent project safety audits
- In-house inspections (on behalf of clients)
- Operation and maintenance program evaluations
- Remote instrumentation monitoring
- Engineering support for draw-down and dewatering of project structures

ABOUT WSP

WSP USA is the U.S. operating company of WSP, one of the world's leading engineering and professional services firms. Dedicated to serving local communities, we are engineers, planners, technical experts, strategic advisors and construction management professionals. WSP USA designs lasting solutions in the buildings, transportation, energy, water and environment markets. With more than 12,000 employees in over 200 offices across the U.S., we partner with our clients to help communities prosper.
