

SaniVue™ *Your Smart tool for sanitation tracking*

“

SaniVue helps you build public confidence in shared spaces. This smart mobile platform gives users an instant snapshot of cleaning routines for shared space and public assets.

”

Customers who frequent high-traffic areas and use shared equipment need real-time information about the cleaning status of said assets and facilities. In response, service providers like transit agencies, hotels, restaurants, libraries and schools designed strict new sanitation and safety procedures — but beyond these practical aspects, they faced the unprecedented challenge of rebuilding public confidence around sharing spaces in the wake of COVID-19.

To close the confidence gap, WSP's SaniVue™ cloud-based platform provides organizations with the ability to track, audit, and communicate asset cleaning activity to users in a timely manner. This innovative tool is the first in the market and provides continuous data to both the internal and public audiences. With a glance at the dashboard, users can get a timely snapshot of how recently their bus, streetcar or hotel room has been sanitized — empowering them with the information they need to make informed choices. Database entries in SaniVue™ are stored securely in the cloud, complying to the highest global data security and privacy standards.

Benefits

BUILD PUBLIC CONFIDENCE

SaniVue™ presents public users hesitant in using public transit and public facilities with transparent data about the cleanliness of buildings and assets.

CUSTOMIZABLE

SaniVue™ is a monthly subscription-based smart solution with features that can be configured and customized to fit your needs.

EASY TO USE

The cloud-based solution is compatible with all internet-connected smart mobile devices and does not require you to download or install complex programs.

CENTRALIZED DATA MANAGEMENT

SaniVue™ provides agencies convenient and comprehensive monitoring of cleaning across all assets as well as the ability to audit the cleanliness condition of assets and export data.

IMPROVED PRODUCTIVITY

SaniVue™ provides cleaning staff and administration with an easily-accessible checklist of cleaning services required.

CONTACTLESS AND HYGIENIC UPDATES

Cleaning staff and admins can access SaniVue™ on their personal mobile devices and avoid contact through shared devices.

Let's build safer public spaces, together.

A brand you can trust

The SaniVue™ platform was developed by WSP's team of global experts, who advise transit agencies, municipalities, and billion-dollar private companies around the world. It was designed by industry leaders who have an understanding of the challenges involved in optimizing public assets under uncertain and highly changeable conditions.

As trusted advisors, we understand the power of reputation. That's why the SaniVue™ platform can be packaged with your branding, to help make your name synonymous with transparency, trust and reliability.
