WSP USA

WE ARE

Inspired by diversity
Driven by inclusion
Committed to equity

WSP

TURNING CHALLENGES INTO OPPORTUNITIES.

As one of the world's leading engineering, environmental and professional services firms, WSP USA provides comprehensive engineering, design and advisory services to clients in the buildings, transportation, energy, water and environment markets. Our teams are well positioned to deliver successful projects, wherever our clients need us.

Enduring projects.

We play a key role in delivering a more resilient world. Through our project delivery, we provide Future Ready[®] thinking and unparalleled technical expertise to help our clients thrive. We actively seek out the most transformative solutions to pioneer a more sustainable future.

Our diverse teams are comprised of talented, skilled and experienced professionals who are:

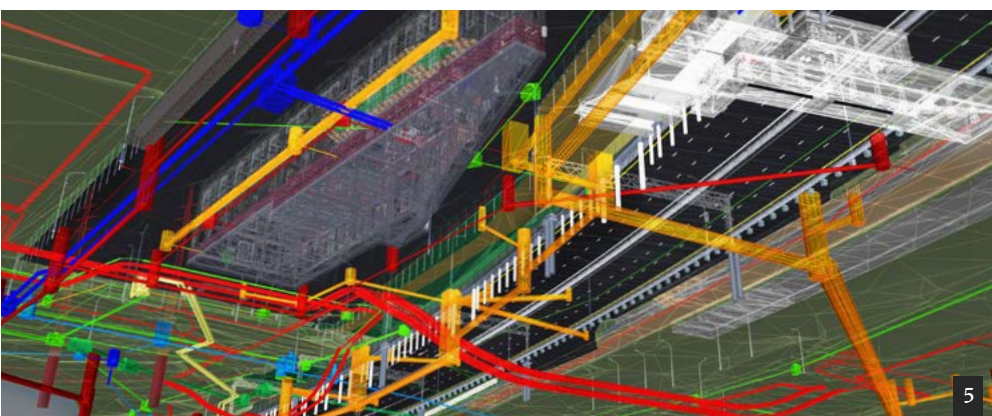

- **Collaborative** and thrive on challenge and unconventional thinking.
- **Leaders** in multiple technical fields.
- **Committed** to the highest ethical standards.
- **Passionate** about delivering sustainable work that improves our communities and creates a more equitable future.

ADVISORY

Business and operational solutions throughout the project life cycle.

Changing economic conditions, evolving government priorities, aging assets and emerging technologies are among the biggest challenges faced by developers, owners and operators of public and private infrastructure. We offer our clients a unique combination of infrastructure expertise and management consulting leadership to help them determine how best to develop assets and cost-effectively deliver services.

EARTH AND ENVIRONMENT

The leading consultant to the world's green transition.

We bring together the preeminent knowledge and experience of more than 14,000 environmental experts with leading edge technology to help our clients achieve their goals related to ecological restoration, environmental rehabilitation, sustainable resource development, environmental health and safety, and environment, social and governance. We provide comprehensive capabilities in geosciences, natural and cultural resources, site assessment and restoration, air quality and noise studies, environmental permitting and compliance, hazardous materials and waste management, and climate resilience and sustainability.

ENERGY

Advancing clean energy solutions.

WSP is in the vanguard of the effort to decarbonize the global economy and meet the goal of net zero by 2050. We leverage the skills and experience of experts in renewable energy; electrification; carbon capture, usage and storage; and hydrogen utilization and storage to help clients achieve their clean energy objectives. WSP's services span the project development life cycle, from planning, permitting and environmental through design, development and commissioning.

1. Specialized engineering solutions for the U.S. offshore wind market
2. Design and development of district energy systems to serve diverse facilities
3. Premier designer of subsurface energy storage and waste disposal facilities
4. Improving resilience and reliability for power transmission and distribution systems
5. Hydropower and dam engineering for safe, reliable operation and regulatory compliance

FEDERAL PROGRAMS

Delivering mission excellence.

WSP works with federal agencies to engineer life-improving solutions, foster sustainable communities and protect national and natural resources. Government clients turn to us because we have the global resources to provide integrated support anywhere in the world and at any point in a project's life cycle – from planning, design and engineering to construction and program management to logistics and operations and maintenance. We develop solutions that keep us safe today and prepare us for what tomorrow may bring.

PROGRAM AND CONSTRUCTION MANAGEMENT

A reliable partner for efficient and cost-effective project delivery.

The successful delivery of projects in line with stakeholder objectives is a trademark of WSP. We have delivered thousands of projects on schedule and within budget, while ensuring that all operational requirements are safely met. WSP's program and construction management expertise spans decades, supporting public and private sector clients across every market to execute complex, multiphase programs, while ensuring effective project delivery from beginning to end.

PROPERTY AND BUILDINGS

Solution-driven advisors for a resilient built environment.

WSP's team of specialists provides an integrated offering including structural, mechanical, electrical, plumbing and fire protection engineering, plus related specialty and consulting advisory services. Our reputation for innovative thinking, outstanding service, value enhancement and environmental responsibility has been earned through participation on acclaimed projects worldwide.

We thrive on the toughest engineering and design challenges, communicating complex technical ideas on a human level to aid our clients' decision-making processes and inspire the best possible solutions.

TRANSPORTATION

Advancing mobility.

WSP views transportation as a means to improve the communities in which we live and work. We apply the latest concepts in sustainable development to improve mobility and connectivity, promote economic growth and social equity, and improve environmental conditions. WSP offers over a century of experience in all forms of transportation infrastructure, including airports, bridges, highways, ports, railroads, tunnels and transit. We help clients find the right solutions to their challenges through innovative planning and design, a deep knowledge of the federal and local regulatory environments, and an understanding of the alternative project delivery methods available.

WATER

Future Ready[®] water solutions.

WSP is a full-service water solutions provider offering public agencies, water utilities owners and operators, and private sector organizations with long-term resilient solutions to improve water quality and reliability while meeting strict environmental regulations. We partner with clients to develop life-improving solutions, foster sustainable communities, and protect critical natural resources. Our expertise ranges from planning and engineering of water conveyance and wastewater treatment, to surface water and groundwater protection and management, to water resource enhancement and diversification.
