### **WSP USA Welcomes Steven Gray to Maritime Engineering Team**

*Gray brings 26 years of civil engineering experience to his new role, including planning, design and construction for key container, bulk and break bulk terminals.*

**SEATTLE, August 18, 2022** — Steven Gray has been named a national maritime senior project manager at WSP USA, a leading engineering and professional services consultancy, serving as the national maritime civil leader for one of the largest waterfront/marine design groups in the U.S.

“We are excited to have Steven join our nationally recognized maritime engineering team,” said Kosal Krishnan, the national maritime market leader for WSP. “Our maritime group has been a leader in waterfront design for more than 50 years, and Steven brings extensive project management and upland design experience that will help our dynamic group improve critical waterfront facilities for our clients.”

As a vice president and national maritime civil leader, Gray will manage, oversee and review projects across all geographies in the U.S. for a wide range of different clients, such as port authorities, terminal operators, the U.S. Navy and the Coast Guard. He will also oversee the maritime civil group and work towards expanding the group and the practice.

Gray has 26 years of civil engineering experience and has worked on numerous container, bulk and break bulk terminal projects, as well as waterfront facilities for the U.S. Navy.

He was project manager and port planner for the Break Bulk and Ro-Ro Study in Seattle-Tacoma, as well as lead planner and modeler in phases 2 and 3 for the new Vieu Container terminal at the Port of Montreal. He was lead project engineer for Naval Station Everett Small Craft Launch in Everett, Washington and was also part of structural evaluation for Nisqually earthquake damage at various Navy facilities in the Puget Sound.

Gray is a graduate of the University of Washington with a bachelor's degree in civil engineering.

The WSP maritime group is comprised of analysts, planners, and engineers with a variety of technical backgrounds including economists, operations analysts, civil, environmental, ocean and structural engineering, and port planning, all working in several key locations across the U.S. and internationally.

### **About WSP USA**

WSP USA is the U.S. operating company of WSP, one of the world's leading engineering and professional services firms. Dedicated to serving local communities, we are engineers, planners, technical experts, strategic advisors and construction management professionals. WSP USA designs lasting solutions in the buildings, transportation, energy, water and environment markets. With more than 12,000 employees in 200 offices across the U.S., we partner with our clients to help communities prosper. [wsp.com](http://wsp.com)
