02/02/2023, 18:31 - : My name is Jean Lazarus. I am a concerned South African Citizen. My phone number is . My email address is

I object to Total energies or anyone else drilling oil in the oceans off of South Africa. These pristine waters are migration routes for whales and dolphins and are home to so many species of aquatic animals. Oil companies have traditionally not been trustworthy with regards to prevention and clean up of oil spills. How do you clean oil out of the ocean any way? These areas are used by fisher people to harvest food and ecotourism brings in much income to the area. Both of these and many more economic fields would be threatened merely to being more income to multinational shareholders. This at a time when climate change is threatening our economies and human life in such a devastating manner. I object on these grounds and many more

02/02/2023, 18:31 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 08:22 - WSP: Good day Jean,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 07:59 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 13:31 - : Good Day. I'd like to protest the following but cannot seem to register on the website provided below:

Organisations and Individuals have until 3 February to object/ comment on Total's plan to drill and build new gas pipelines off Mossel Bay in the Outeniqua Basin. Why does this concern us all?Â

1. Lies in the middle of the Agulhus Current that is a major highway for Whale and Sardine migration.
 2. Borders on a Marine Protected area.
 3. Certain Government officials and their buddies stand to gain massively from the proposed x R8 billion annual income.
 4. Have you heard about Karpowership??
 5. Gas and Oil is a super high risk to the environment, tourism and other economic endeavors along coastline.
 6. Contribute to green-house gases and release of carbon stores of seabed sediment.
- etc etc

The ESIA being done by WSP (A consulting firm that consults both on environmental and oil and gas drilling industry - conflict of interest much?) has been snuck through the eastern Cape and ignored the greater Western Cape.Â

The most terrifying thing is if this is allowed, it will open our entire coastline to oil and gas companies and we will be sitting in hearings for possibly decades to come. We have to make a stand now (see map).

We need EVERYONE to comment. We did this before for Shell, and we can do this again. Please raise your voices South Africa! And be prepared, this is not the end of it.

To object: register as an interested party at the data-free websiteÂ <https://wsp-engage.com/total-11B12B/>, sending a WhatsApp message to WSP at , or emailing them atÂ teepsaEIA@wsp.com. Those who register before 3rd of February will have an additional opportunity to comment in March or April once the specialist studies have been completed.

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

01/02/2023, 13:40 - : This message was deleted

01/02/2023, 13:46 - : Gary Kritzinger

Knysna/Rheenendal area.

01/02/2023, 13:46 - WSP: Good day Gary,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 23:51 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 23:51 - : Total & Shell should rather invest in finding alternative renewable energy. While finding oil and gas off our shores could help alleviate the immediate poverty in our country, the long term effects of harm done to the eco system would negatively impact the whole world.

02/02/2023, 23:51 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 23:53 - : Barbara Anne Frost

No email

Concerned Citizen.

03/02/2023, 08:30 - WSP: Thank you for your submission to the Scoping process of the TEEPSA Block 11B/12B ESIA . Section 42(a) of the EIA Regulations (2014), as amended, under which the ESIA is being conducted, stipulates that all persons that have provided comment are included in the register as an Interested & Affected Party (I&AP).

If you do not wish to be registered as an I&AP, kindly respond to this email requesting removal from the register. If you remain on the I&AP database, your comment will be included in the project Comment and response Register for consideration in the Scoping process.

02/02/2023, 17:24 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 17:24 - : To whom it may concern, I Telani van bosch South African citizen living in Cintsa East object to the government allowing big oil and gas companies to destroy our oceans to seek for the purpose to get oil and gas. This had a huge negative impact now and for the next generation that has no voice now. We can't live in the now but for Tey future of our ocean/nature. This is NOT the solution. The ocean does not belong to the government. It belongs to nature. It might be the easy answer now with the benefit to fill our corrupt government pockets but it will be the end to life in earth. We cannot damage the ocean as it serves us very well reducing corban dioxide and producing clean fresh air. We need oxygen more than oil and gas!! We have live centuries before without so why no now??

02/02/2023, 17:24 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 17:25 - : Telani van bosch, , and Cintsa East,
Eastern Cape

03/02/2023, 07:04 - : Telani van bosch, , and individual

I object because we need to leave our oceans alone to sustain life on earth for foreseeable future. The ocean is highly important to keep healthy as it vital for all eco systems. Leave the ocean alone!! Especially for the next generation that has no voice!!

03/02/2023, 08:33 - WSP: Thank you for your submission to the Scoping process of the TEEPSA Block 11B/12B ESIA . Section 42(a) of the EIA Regulations (2014), as amended, under which the ESIA is being conducted, stipulates that all persons that have provided comment are included in the register as an Interested & Affected Party (I&AP).

If you do not wish to be registered as an I&AP, kindly respond to this email requesting removal from the register. If you remain on the I&AP database, your comment will be included in the project Comment and response Register for consideration in the Scoping process.

02/02/2023, 08:23 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 08:23 - : Good Morning

I would like to voice my objection to any further exploration or mining of fossil fuels, both on land and in the ocean. There is simply no reason whatsoever to add more greenhouse gasses to our atmosphere other than financial gain of mining companies.

My plea to these companies is to invest in renewables instead.

Thank you

Elize Cloete

02/02/2023, 08:23 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 08:24 - : I am Elize Cloete

I am a Botanist

02/02/2023, 10:59 - WSP: Good day Elize ,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 08:00 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 17:25 - : Barbara Mfumadi

Private individual.

I object to gas pipelines being built or gas extracted off the coast of Mossel Bay!

I question of ESIA consultants independence, the fact that the pipeline will be run by PetroSA once it's up and running is frightening! The government has run most of its institutions into the ground and so how will this be any different. There are so many ways that this project can go wrong from the oil/gas spilling into the Augulus current, to corruption to lack of jobs for small scale fishers etc

02/02/2023, 08:10 - WSP: Good day Barbara,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 21:12 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 21:12 - : NO OIL!!!!

Do yourself a favour and just Google "images of oil and gas disasters at sea" -- inform yourself of just how common massive accidents are on big oil projects and how all too often there is *no accountability* , *no clean up* , *no compensation* .

WE CAN NO LONGER STAND BY & ALLOW THIS TO HAPPEN!

Our coast deserves protecting.

#oceansnooil

03/02/2023, 10:55 - : LAST DAY TO OBJECT!!

WhatsApp your name and objection to Total Energies sinking new pipelines between St Francis and Mossel Bay. Right in the whales migratory path!! Takes 5min. If you don't think it's important, google images of oil disasters at sea. Save our Incredible coastline. Feel free to copy & paste the message below, or write your own. Send to:

I am vehemently objecting to the licensing of Total Energies because there is a strong economic, social, and ecological argument globally against any activity that endangers our local and global ecosystem. Seeking to exploit an energy source whose time has already past is self destructive and damaging to ALL LIFE. If granted, this license will further destroy the viability of of living things and our planet. It is shortsighted and serves to benefit only a few. This pipeline, if laid, will have a direct negative impact on the delicate whale populations that migrate through these waters. It's unthinkable and I must not go ahead. For all our sakes.

Very concerned citizen

01/02/2023, 16:39 - : Attention:

Debbie (herein representing WSP - IESP for APPLICATION FOR BLOCK 11B/12B - REF No: 12/4/13 PR)

OBJECTION TO THE APPLICATION for any exploration and/or production by Total Energies and Partners, along the South African coasts Mossel Bay to Cape St Francis

1. I am an interested and affected party.
2. I object to the application for production rights, any exploration rights or any seismic surveying proposed by Total Energies and partners for the specified area now or at any time in the future.
3. The scoping report clearly recognises the coast of South Africa for its eco systems and clearly lists the appalling impact that their production will have on these systems, YET they will proceed if granted approval by Petroleum Agency SA
4. Any exploration and or production will negatively impact marine plant, bird and consequently human life. By the time full impact is known, irreversible damage is done.
5. The risks due to the course of such operations ie, leaks, spills, blasts etc, are too high to even consider risking one.
6. Total Energies and their Partners, relinquish all responsibility, financial or otherwise, that may arise in the explored blocks after they're done with production and have moved out. This becomes the responsibility of the SA government.
7. They get to leave all their equipment, material etc on the seabed because it's too costly for them to remove.
8. The "reasons " of benefit to the economy, contribution towards

alleviating the energy crisis, and job creation are fancy wrappings. The people and the environment are worse off in the long run. Corrupt politicians, greedy and manipulative wealthy individuals and corporations are the designed benefactors and beneficiaries.

01/02/2023, 11:41 - : To drill for oil and gas in South Africa's seas are shortsighted and careless in view of the international climate crisis. Minister Gwede Mantashe of Minerals and Energy should not drive and support this so-called Blue Ocean policy of the ANC/SACP government which will result in large scale damage to ocean life and the atmosphere. South Africa is already known for large- scale fossil fuel pollution in the eastern Mpumalanga region. South Africa must not further add to this environmental pollution by drilling for and extracting oil and gas. To proceed with these short sighted South African government policy will be absolutely reckless. The envisaged Karpower Ship gas to energy plan will also be environmentally destructive for decades to come. This cannot proceed in view of this cardinal fact

01/02/2023, 13:02 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

Questions regarding TotalEnergies Mossel Bay gas drilling & new pipeline building BLOCKS 11B/12B

Good day. Please receive my questions regarding the ESIA presented at the Scenery Park, East London Hearing on Thursday 26 Jan 2023 for the proposed new well drilling and pipeline building & linking up to MosGas from Blocks 11B/12B

Regarding possible damage:

1)

- How long have the older gas wells (as you are drilling new wells in the same area) been active?
- Has there been any monitoring of their social and environmental impacts?
- If so, what have these impacts been?
- Who did the monitoring?

2)

- How might this project, with or without any accidents, impact upon the local fisheries?
- How might this project, with or without any accidents, impact upon the whale and turtle migrations, and the sardine run?
- How might this project, with or without any accidents, impact upon local tourism?

3)

- If an accident occurs, what is the extent of the impact, including the range of coastline and ocean affected, given that the Agulhas current reaches just over 9km/hour?
- Can TotalEnergies guarantee no accident, and if not, how can TotalEnergies justify, in economic terms or otherwise, any harm done when this is being done in a living environment, and therefore on its terms?
- If there is an accident, can TotalEnergies guarantee compensation for those negatively affected?
- If there is an accident, is there an objective body to decide on issues of compensation?

Thank you for your consideration.

-Kate

02/02/2023, 08:08 - WSP: Good day Kate,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

Sector: concerned citizen/ ocean steward of Wild Coast

I would like to submit my Objection to the TotalEnergies proposal for Block 11B/12B from Mossel Bay to Cape St. Francis. I believe it is ethically & morally abhorrent that any company knowingly continues to explore for and mine fossil fuels given the precarious environmental situation of our planet, and continues to do so using invasive, harmful, highly risky methods that should even require permission from government and the People. I say No.

03/02/2023, 09:19 - : Good morning. Please confirm receipt of my Objection, and confirm

that it has been noted and captured. Thank you
03/02/2023, 09:20 - WSP: Good day Kate,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

03/02/2023, 09:20 - : Thanks!

03/02/2023, 09:22 - : Bear in mind, however, that the first message was not merely a 'comment', but a Question. And that my message yesterday was not merely a 'comment', but an Objection.

02/02/2023, 13:10 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 08:48 - : As a concerned citizen, I wish to register my objection to plans for TotalEnergies' proposed off-shore production right, on the grounds of the high risk both drilling and pipelines pose to the environment, as well as the threat to tourism and fishing. I further object to the proposed location as it is in the path of the annual sardine and whale migration and is in proximity to a Marine Protected Area, which makes the proposal completely unacceptable.

Liesl Oberholster

02/02/2023, 11:22 - WSP: Good day Liesl,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 11:42 - : Thank you.

01/02/2023, 09:06 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 09:06 - : Stop the oil and gas drilling along our coastline. Stop the corruption between government and consulting agency - environmental and drilling for oil and gas... Come on - ETF

01/02/2023, 09:06 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

01/02/2023, 09:08 - : Mary Jane Waite / Garden Route Biosphere Reserve
2019 team for UNESCO

01/02/2023, 09:35 - WSP: Good day Mary,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

03/02/2023, 12:37 - : Name : Luyanda

Surname : Ndaba

Contact number : email :

I am a South African Citizen who's opposing the project that the entity "Total Energies" is intending to implement in Mossel Bay & Cape St. Francis given the approval of Petroleum Agency SA as the project will have severe negative impact on the environment. This project is only beneficial for the short term, unsustainable & damaging. The environmental impact will span to further numerous & various aspects which will only contribute to the number of problems that the country is facing. This short term project will in the long term prove to be unviable.

03/02/2023, 12:37 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 01:27 - : This is ANOTHER atrocity directed at the South African people. We are ALL dealing with SO much already, and now this corrupt, greedy government, is now supporting TotalEnergies through PetroSA, to drill off our beautiful coastline, in no less than than 10 places!!!! along a 120km stretch of ocean. This was a similar move made by Shell and we SAcans, stood together, and supported the fragile communities that try to eke out a living from fishing. They deserve to do that in pristine oceans! Not oceans polluted by oil!

Look at what has happened in Nigeria, in the delta! The locals were totally excluded (work is NOT and NEVER will be provided for the locals, as is 'promised') and they began stealing from the oil pipes and completely contaminated that once beautiful life-giving area.

The colonists fucked up years ago, going into countries they had NO business in, and now you short-sighted, money-grabbing, self-serving imbeciles, are doing it some MORE!! Fuck off and use your money and power to do GOOD, KIND and UPLIFTING works for humanity. The world NEEDS that. Not what you people are preposing....

Please, make your legacy one that breaks the mold of just taking and leaving a trail of poverty and unhappiness behind. PLEASE

01/02/2023, 17:31 - : Attention:

Debbie (herein representing WSP - IESP for APPLICATION FOR BLOCK 11B/12B - REF No: 12/4/13 PR)

OBJECTION TO THE APPLICATION for any exploration and/or production by Total Energies and Partners, along the South African coasts Mossel Bay to Cape St Francis

1. I am an interested and affected party.
2. I object to the application for production rights, any exploration rights or any seismic surveying proposed by Total Energies and partners for the specified area now or at any time in the future.
3. The scoping report clearly recognises the coast of South Africa for its eco systems and clearly lists the appalling impact that their production will have on these systems, YET they will proceed if granted approval by Petroleum Agency SA
4. Any exploration and or production will negatively impact marine plant, bird and consequently human life. By the time full impact is known, irreversible damage is done.
5. The risks due to the course of such operations ie, leaks, spills, blasts etc, are too high to even consider risking one.
6. Total Energies and their Partners, relinquish all responsibility, financial or otherwise, that may arise in the explored blocks after they're done with production and have moved out. This becomes the responsibility of the SA government.
7. They get to leave all their equipment, material etc on the seabed because it's too costly for them to remove.
8. The "reasons " of benefit to the economy, contribution towards

alleviating the energy crisis, and job creation are fancy wrappings. The people and the environment are worse off in the long run. Corrupt politicians, greedy and manipulative wealthy individuals and corporations are the designed benefactors and beneficiaries.

03/02/2023, 15:15 - : This message was deleted

03/02/2023, 15:19 - : Dear WSP,

I strongly oppose the plans for Total to drill and build new gas pipelines off Mossel Bay in the Outeniqua Basin for reasons that have been listed by thousands of caring, environmentally conscious citizens of our beloved country, and hereunder are just some of the reasons why:

1. Lies in the middle of the Agulhus Current that is a major highway for Whale and Sardine migration.
2. Borders on a Marine Protected area.
3. Certain Government officials and their buddies stand to gain massively from the proposed x R8 billion annual income.
4. Have you heard about Karpowership??
5. Gas and Oil is a super high risk to the environment, tourism and other economic endeavors along coastline.
6. Contribute to green-house gases and release of carbon stores of seabed sediment.

CARING FOR SA's FUTURE!

Sincerely,

Bridget Green

The Craggs, Western Cape

03/02/2023, 09:27 - : Good Day, my Name is Edward Mans I am against the offshore drilling, it will have very bad repercussions for our sea life as well as our future generations. Must totally stop Total to do the Drilling, NO DRILLING

03/02/2023, 09:27 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 09:28 - : Edward Mans , stop the offshore drilling 03/02/2023, 12:57 - WSP: Good day Edward,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

03/02/2023, 09:30 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 09:30 - : *HOW DARE YOU!â€ *!

I am objecting to the licensing because there is a strong economic, social, ecological and national and global argument against any activity that endangers our local and global ecosystem while seeking to exploit an energy source whose time has already past because it has started to and will continue to destroy the viability of of living space and our planet.

We will be watching you!

This is all wrong!

HOW DARE YOU!

People are suffering. People are dying

This Lies in the middle of the Agulhus Current that is a major highway for Whale and Sardine migration.

Borders on a Marine Protected area.

Certain Government officials and their buddies stand to gain massively from the proposed x R8 billion annual income.

Gas and Oil is a super high risk to the environment, tourism and other economic endeavors along coastline.

Contributes to green-house gases and release of carbon stores of seabed sediment.

etc etc

The most terrifying thing is if this is allowed, it will open our entire coastline to oil and gas companies and we will be sitting in hearings for possibly decades to come.

Entire ecosystems are collapsing.

We are in the middle of a mass extinction and all you care about is money! The science is crystal clear and you choose to ignore and look away for greed and money.

HOW DARE YOU!

02/02/2023, 15:21 - : Hello my name is Tutani Mpunga a registered Freelance guide. I am a custodian of Mpondoland in the Eastern Cape Province of South Africa.

As the son of the soil. Since i was young i have been raised by the sea food that my mother and father harvest to eat and feed us as a family.

Now i am a grown up man who has his family. I also raise my family the way my parents raised us. Started fishing in the fresh water pools, in the rivers and now i use ocean.

We don't go to Universities to study about the environment we grew up on it.
With the economic point of view oil and gas have a high value. I

As the citizen of South Africa i have noticed that city life is completely different from rural life. Our government must give us freedom as we voted for.

We know what kind of development we want not them to decide about our for fathers land that we want to inherit to our future generations.

Public participation is very important in what ever our government is planning. Yes we appointed them to be our voice that turned to be our decision makers. They must stop exploiting our ocean for a quick buck.

Life is priceless.

02/02/2023, 15:21 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 15:44 - : We don't have a want oil and gas drilling in our ocean because is going to kill us. Once a ring of a chain is broken the whole chain is broken.

A healthy ecosystem is where all organisms benefits from one another without killing each other.

Government should support us on what we want that is Eco Tourism Agro Farming because these are sustainable development for us who are fully dependent on soiland all that exist on it.

02/02/2023, 15:50 - WSP: Dear Stakeholder,

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project and capture your comments in the comment and response report to be submitted as part of the Final Scoping report.

02/02/2023, 15:53 - : My name is Tutani surname Mpunga cell phone number

Email Address

02/02/2023, 15:53 - WSP: Good day Tutani,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 16:01 - : As a freelance guide i always encourage you to all stakeholders to live their offices and go to the ground and fully engaged with people who are involved in the area they want to develop. Also pay a great respect on what people on the ground feel about the development.

Let people decide about their lives than trying to convince them to fall in a new life that they never experienced before.

We are living in a democratic country. Gas and oil is going to destroy our environment thereafter we follow.

08/02/2023, 09:03 - : As the coastal residents of Mpondoland we felt excluded in decision making about the ocean.

We're South African citizens who vote for a democratic government for a democratic rights.

It is our rights to ensure that our ocean that we are using for our benefit to be protected.

Oil and gas are non renewable resources that can not sustain our lives and the lives of our future generations.

We inherent inherent our ocean from our ancestors with the knowledge of using it sustainable. This is the same

knowledge that we want our future generations to use it.

We are busy working hard to promote eco tourism that also benefits local communities. The main attraction for our clients is to see marine life. For example we do have a Sardine run here in the Wild Coast that turned to be a sardine fever once they reached South Coast.

There are families who still walk 15kilometres to go and collect sea food to feed their families.

Our government with DEFF has started small scale fishing co operatives to use ocean as the means of supporting their families.

I don't think is the same government who wants to form boarders and sell our ocean in small farms.

We as the coastal residents once our ocean is destroyed we will be destroyed too

We are all benefiting into the sea now but we can not all be employed or benefit buy mining our ocean. We are facing a huge crisis of climate change because of the pressure that we apply in natural resources let us save our ocean to protect us.

09/02/2023, 12:01 - WSP: Good day Tutani,

Thank you for your comment. It will also be captured in the comment and response report and submitted as part of the Final Scoping report.

03/02/2023, 21:51 - : Name: Bruce Tyrone Kaiser

Cell no.:

Email:

I represent myself as a concerned citizen of South Africa

I am sending an OBJECTION to the TotalEnergies plan to drill new wells and build new pipelines in the 12000 square kilometre area between Mossel Bay and Cape St. Francis in South Africa. I am concerned for the lives of marine animals that live there and migrate through those waters. So much of the ocean is being disrupted by human activities. South Africa should lead by example and invest in renewable energy(HUGE potential to uplift our economy), while taking care of the little wildlife that we have left! With the technology available to us for renewable energy, there is no reason to still be seeking and extracting fossil fuels.

03/02/2023, 22:04 - : Dear WSP,

I strongly oppose the plans for Total to drill and build new gas pipelines off Mossel Bay in the Outeniqua Basin for reasons that have been listed by thousands of caring, environmentally conscious citizens of our beloved country, and hereunder are just some of the reasons why:

1. Lies in the middle of the Agulhus Current that is a major highway for Whale and Sardine migration.
2. Borders on a Marine Protected area.
3. Certain Government officials and their buddies stand to gain massively from the proposed x R8 billion annual income.
4. Have you heard about Karpowership??
5. Gas and Oil is a super high risk to the environment, tourism and other economic endeavors along coastline.
6. Contribute to green-house gases and release of carbon stores of seabed sediment.

CARING FOR SA's FUTURE!

Sincerely,

Tiago Rebelo

02/02/2023, 14:25 - : I would like to register as an interested party to object to Totals proposed activities of the coast of Douth Africa. My email address is . If that is a more appropriate form of objecting

02/02/2023, 14:25 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 14:28 - : Jill Callaghan . Mobile . . I donâ€™t

belong to any sector but wish to object. I live at the coast and am very concerned about environmental issues.

02/02/2023, 15:35 - WSP: Good day Jill,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 15:36 - : Thank you

02/02/2023, 14:27 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 14:27 - : I strongly object to the project of drilling for gas of the coast of mossel bay and Plett ... it is far too sensitive and too much at stake with our wild life at sea ... it is a sensitive time on the planet and sensitive area and way too much can go wrong " by mistake ".... I SAY NO

02/02/2023, 14:27 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 14:28 - : Carol levin PLETTENBERG bay western cape

02/02/2023, 15:26 - WSP: Good day Carol,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 13:10 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 11:48 - : I hereby object to any/all ocean mining drilling or fracking. We need to protect our oceans shorelines from exploitation pollution and the total disregard of all life on this planet.

Angie Bauer

Earth citizen concerned about our planet

02/02/2023, 11:57 - WSP: Good day Angie,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 08:00 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 17:37 - : I, Abraham Johannes Truter with SA ID no. , hereby would like to object to the proposed drilling and associated works by TotalEnergies off the coast of Mosselbay in the Outeniqua Basin.

02/02/2023, 08:11 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 08:12 - : Abraham Johannes Truter, , , private individual that stay at the coast.

02/02/2023, 08:27 - WSP: Good day Abraham,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 08:00 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 17:44 - : Attention:

Debbie (herein representing WSP - IESP for APPLICATION FOR BLOCK 11B/12B - REF No: 12/4/13 PR)

OBJECTION TO THE APPLICATION for any exploration and/or production by Total Energies and Partners, along the South African coasts Mossel Bay to Cape St Francis

1. I am an interested and affected party.
2. I object to the application for production rights, any exploration rights or any seismic surveying proposed by Total Energies and partners for the specified area now or at any time in the future.
3. The scoping report clearly recognises the coast of South Africa for its eco systems and clearly lists the appalling impact that their production will have on these systems, YET they will proceed if granted approval by Petroleum Agency SA
4. Any exploration and or production will negatively impact marine plant, bird and consequently human life. By the time full impact is known, irreversible damage is done.
5. The risks due to the course of such operations ie, leaks, spills, blasts etc, are too high to even consider risking one.
6. Total Energies and their Partners, relinquish all responsibility, financial or otherwise, that may arise in the explored blocks after they're done with production and have moved out. This becomes the responsibility of the SA government.
7. They get to leave all their equipment, material etc on the seabed because it's too costly for them to remove.
8. The "reasons " of benefit to the economy, contribution towards

alleviating the energy crisis, and job creation are fancy wrappings. The people and the environment are worse off in the long run. Corrupt politicians, greedy and manipulative wealthy individuals and corporations are the designed benefactors and beneficiaries.

Full name: Waseem Kolia
02/02/2023, 08:12 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

02/02/2023, 10:05 - : Name: Waseem

Surname: Kolia

Contact:

Email:

Sector: I am an individual and a local tourist to the area.

02/02/2023, 11:53 - WSP: Good day Waseem,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

03/02/2023, 06:35 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 06:35 - : Hi there. Just want to confirm that this is one of the ways in which I can object to the building of pipeline?

03/02/2023, 06:35 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 06:38 - : Kyle Ansell - - - tourism - total-11B12B 03/02/2023, 08:32 - WSP: Thank you for your submission to the Scoping process of the TEEPSA Block 11B/12B ESIA

. Section 42(a) of the EIA Regulations (2014), as amended, under which the ESIA is being conducted, stipulates that all persons that have provided comment are included in the register as an Interested & Affected Party (I&AP).

If you do not wish to be registered as an I&AP, kindly respond to this email requesting removal from the register. If you remain on the I&AP database, your comment will be included in the project Comment and response Register for consideration in the Scoping process.

03/02/2023, 08:32 - WSP: Good day Kyle, yes it is.

03/02/2023, 08:59 - : Thanks.. I think actions like this will destroy this beautiful country and ruin livelihoods... We need to change the way we do things and people with the power (global) need to be the ambassadors this planet ðŸŒŒ needs. STEP UP TO THE CHALLENGE, THE BIGGEST ON YET!!!

03/02/2023, 08:52 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 08:31 - : I am vehemently objecting to the licensing of Total Energies because there is a strong economic, social, and ecological argument globally against any activity that endangers our local and global ecosystem. Seeking to exploit an energy source whose time has already past is self destructive and damaging to ALL LIFE. If granted, this license will further destroy the viability of of living things and our planet. It is shortsighted and serves to benefit only a few. This pipeline, if laid, will have a direct negative impact on the delicate whale populations that migrate through these waters. It's unthinkable and I must not go ahead. For all our sakes.

Very concerned citizen

02/02/2023, 14:32 - : Paul Kuhne

Mosselbay

02/02/2023, 15:44 - WSP: Good day Paul,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

01/02/2023, 10:53 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 10:53 - : Organisations and Individuals have until 3 February to object/ comment on Total's plan to drill and build new gas pipelines off Mossel Bay in the Outeniqua Basin. Why does this concern us all?Â

1. Lies in the middle of the Agulhus Current that is a major highway for Whale and Sardine migration.
 2. Borders on a Marine Protected area.
 3. Certain Government officials and their buddies stand to gain massively from the proposed x R8 billion annual income.
 4. Have you heard about Karpowership??
 5. Gas and Oil is a super high risk to the environment, tourism and other economic endeavors along coastline.
 6. Contribute to green-house gases and release of carbon stores of seabed sediment.
- etc

#totaldestruction

#totalfallacy

#totallyunforgivable

I object to this in the strongest possible terms! We don't need this. We will be killing the ocean even quicker than what we are doing now! This means: no life cycle for your children and your grandchildren, earth will become like Mars.

NO DRILLING, NO GAS, NO OIL!

Thank you. Brigitta

Concerned citizen.

I object to the proposed drilling and pipelines to be done in the ocean off the coast of South Africa. This action will cause irreparable damage to our marine and coastal life. The drilling and shockwaves will harm the sea creatures such as whales and dolphins, and the pollution and subsequent oil spills will destroy the beaches and life not only in the sea but in bird life and coastal communities as well. Not to mention the many people who count on the sea for fishing and making a living.

Thank you

25/01/2023, 19:57 - : My Name is Mphumezi Glen Tsomo

Black entrepreneur who owns company called Little Soil Tsomo Pty Ltd resides in Motherwell township

I have attended the stakeholder engagement.

Firstly and foremost I was not impressed by the presentation at all because I was in public participation engagement but I come out with nothing what I saw and observed the presentation in Feather Market Hall was one sided very poorly organised what I mean there majority of the people attended were Khoisan people were transported who comes most of them from Northern Areas areas the people and the areas or ward that will be affected by this were not there or represented.

I was born on city of gqeberha Ward60 Wells Estate Motherwell in the coastal area
Ward 2 and 1 Summerstrand and Walmer

Ward 40 kuyga and Seaview people were not the I find it strange that people attended and transported to the event are hardly affected that's one of my concerns didn't even see ward councillors in attendance?

Such development they just remind me like CDC Coega when they came for application they went in motherwell door to door for us to sign their petition they did public participation we were clapping hands having faith that there is new dawn and development in motherwell when CDC was approved same people are watching in the gramstand not participating in anything that was address before unemployment people are coming from more than 100km perimeters of PE participation in jobs and business opportunities.

I as a supplier registered you will have your drilling vessels that will be supplied by ship chandellers that coming outside from our city doing the same distribution that is meant for Small Mirco business Smmees in particular

25/01/2023, 19:57 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

25/01/2023, 19:58 - : Mphumezi Glen Tsomo

26/01/2023, 14:53 - WSP: Good day Mr Tsomo,

Thank you for your comment. It will be captured in the comments and responses report as part of the public participation process.

26/01/2023, 15:17 - : Thank you very much

02/02/2023, 08:00 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 16:54 - : I, MAC WEISSWANGE, , hereby object to Total's plan to drill and build new gas pipelines off Mossel Bay in the Outeniqua Basin.

1. These are in the middle of the Agulhus Current that is a major highway for Whale and Sardine migration.
2. They border on a Marine Protected area.
3. Certain Government officials and their cronies stand to gain massively from the proposed x R8 billion annual income.
4. I object to Karpowership!!!
5. Gas and Oil are high risk to the environment, tourism and other economic endeavors along coastline.
6. Gas and oil emissions contribute to green-house gases and release of carbon stores of seabed sediment.

The ESIA being done by WSP (A consulting firm that consults both on environmental and oil and gas drilling industry - conflict of interest much?) has been snuck through the Eastern Cape and ignored the greater Western Cape.Â

The most terrifying thing is if this is allowed, it will open our entire coastline to oil and gas companies and we will be sitting in hearings for possibly decades to come.

#totaldestruction

#totalfallacy

#totallyunforgivable

02/02/2023, 08:06 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 08:09 - : Margaret Angela Weisswange

I represent the Eastern and Western cape, Block 11B/12B project as a deeply concerned citizen . This cannot be allowed to happen under any circumstances.

02/02/2023, 11:54 - WSP: Good day Margaret,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

30/01/2023, 10:21 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

29/01/2023, 07:32 - : Please register me as an I&AP if not already done so.

Mike Denison

WESSA

03/02/2023, 07:42 - : Register Objection - Total extraction Block 11B 12B

03/02/2023, 08:34 - WSP: Thank you for your submission to the Scoping process of the TEEPSA Block 11B/12B ESIA . Section 42(a) of the EIA Regulations (2014), as amended, under which the ESIA is being conducted, stipulates that all persons that have provided comment are included in the register as an Interested & Affected Party (I&AP).

If you do not wish to be registered as an I&AP, kindly respond to this email requesting removal from the register. If you remain on the I&AP database, your comment will be included in the project Comment and response Register for consideration in the Scoping process.

03/02/2023, 09:48 - : OBJECTION: TOTAL ENERGIES Block 11B/12B: Mike Denison - Strategic Lead: WESSA Coastal Provinces - - - Hereby register objection to Total Energies proposed offshore production right and environmental authorization applications for block 11B/12B .

Objection is founded in the following key points, many of which were not adequately responded to at the public stakeholder engagements. [1] The International Union for the Conservation of Nature (IUCN) has called for a moratorium on new gas and oil exploration and exploitation; [2] The International Energy Agency has stated there is no need for new extraction of offshore oil and gas projects; [3] The awarding of the individual new projects such as 11B/12B is being done in the absence of appropriate studies to understand what the accumulative impact and risk of proposed offshore oil and gas projects off South Africa's coastline present; [4] The pursuit and exploitation of fossil fuels is not in line with sustainable development and is in conflict with the Paris Accord and the Sustainable Development Goals; [5] Insufficient guarantee that Total Energies are able to mitigate a potential environmental disaster; [6] The potential impact on our coastal ecology from noise and other pollution is not fully understood and this poses extreme risk to the natural lifelines of the Agulhas Current which acts as a critically important migration route to an extraordinary diverse set of oceanic and avian species; [7] the proximity of the project to Marine Protected Areas poses risk to the value and benefit of MPAs to our marine, coastal and human livelihoods remaining sustainable; [8] the lack of evidence that the social and economic returns will clearly outweigh the current social and economic benefits of coastal communities dependent on healthy oceans to sustain their livelihoods through our fisheries, tourism and research richness, to mention a few; [8] the lack of evidence that new oil and gas exploitation is a pre-requisite to a responsible and sustainable transition to renewable energy sources; [9] the fundamental flaw in the stakeholder engagement process that has not engaged communities to the south which are at considerable risk given the flow of the Agulhas current should there be an offshore accident. Please ensure I am registered as an I&AP which I have done in person at the East London stakeholder engagement and by whatsapp. Please ensure I am notified of all relevant communications by email or whatsapp.

03/02/2023, 12:59 - WSP: Good day Mike,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

03/02/2023, 17:31 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 17:30 - : Dear Sirs

I object to the proposed Gas Drilling off the Eastern Cape, Western Cape Coast line and would like to be kept informed of any future developments

Yours

Michael Lello

03/02/2023, 17:31 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 17:36 - : Name. Michael Graham Lello

EMail.

Contact.

I am a land owner and permanent resident of St Francis Bay

06/02/2023, 09:46 - WSP: Thank you for your submission to the Scoping process of the TEEPSA Block 11B/12B ESIA . Section 42(a) of the EIA Regulations (2014), as amended, under which the ESIA is being conducted, stipulates that all persons that have provided comment are included in the register as an Interested & Affected Party (I&AP).

If you do not wish to be registered as an I&AP, kindly respond to this email requesting removal from the register. If you remain on the I&AP database, your comment will be included in the project Comment and response Register for consideration in the Scoping process.

01/02/2023, 08:51 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 06:51 - : I would like to object to gas pipelines being built and gas extracted along the South African coast line

01/02/2023, 08:51 - WSP: Dear Stakeholder,

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

01/02/2023, 12:13 - : Lynne price

Private and concerned environmentalist.

01/02/2023, 13:03 - WSP: Good day Lynne,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

01/02/2023, 08:51 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 08:35 - : I, Catherine Kvalsvig, object to the proposed gas pipeline off Mossel Bay because of the damage fossil fuels do to this planet, because of the damage to the sea bed and sea life this construction will cause, because of the potential damage that a leak would do to the marine environment and by extension the environmental, health and economic damage to us South Africans, because investment in fossil fuels hinders investment in renewable energies that are environmentally and economically the logical solution.

01/02/2023, 08:51 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

01/02/2023, 08:59 - : Catherine Kvalsvig, , South African citizen and citizen of world concerned about the impact of fossil fuels on the survival of our planet.

01/02/2023, 09:33 - WSP: Good day Catherine,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 07:59 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 13:10 - : I would love to sign the petition

01/02/2023, 13:11 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

01/02/2023, 13:15 - : Lizl van Rooyen

01/02/2023, 13:15 - :

01/02/2023, 13:16 - :

01/02/2023, 13:16 - : Stopping oil drilling on the South African coast

01/02/2023, 13:24 - WSP: Good Day Lizl,

Please note that this WhatsApp line is for receiving comments on the project and not to sign a petition.

Your comment will be captured in the comment and response report and submitted as part of the Final Scoping report.

01/02/2023, 15:17 - : I will sign everything

01/02/2023, 15:58 - : Organisations and Individuals have until 3 February to object/ comment on

Total's plan to drill and build new gas pipelines off Mossel Bay in the Outeniqua Basin. Why does this concern us all?Â

1. Lies in the middle of the Agulhus Current that is a major highway for Whale and Sardine migration.
 2. Borders on a Marine Protected area.
 3. Certain Government officials and their buddies stand to gain massively from the proposed x R8 billion annual income.
 4. Have you heard about Karpowership??
 5. Gas and Oil is a super high risk to the environment, tourism and other economic endeavors along coastline.
 6. Contribute to green-house gases and release of carbon stores of seabed sediment.
- etc etc

The ESIA being done by WSP (A consulting firm that consults both on environmental and oil and gas drilling industry - conflict of interest much?) has been snuck through the eastern Cape and ignored the greater Western Cape.Â

The most terrifying thing is if this is allowed, it will open our entire coastline to oil and gas companies and we will be sitting in hearings for possibly decades to come. We have to make a stand now (see map).

We need EVERYONE to comment. We did this before for Shell, and we can do this again. Please raise your voices South Africa! And be prepared, this is not the end of it.

To object: register as an interested party at the data-free websiteÂ <https://wsp-engage.com/total-11B12B/>, sending a WhatsApp message to WSP at , or emailing them atÂ teepsaEIA@wsp.com. Those who register before 3rd of February will have an additional opportunity to comment in March or April once the specialist studies have been completed.

#totalfallacy

#totallyunforgivable

01/02/2023, 16:40 - : Is it correct information

02/02/2023, 08:02 - WSP: Good day Lizl,

It seems to be referring to the application we are undertaking

02/02/2023, 08:06 - : We really want you to rather consider a sustainable development for energy

01/02/2023, 08:51 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 07:33 - : Totally against Shell drilling off shore.. this is appalling..

01/02/2023, 08:51 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

01/02/2023, 09:05 - : What is Block 11B and 12 B.

01/02/2023, 09:34 - WSP: Dear Stakeholder,

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Total Block 11B/12B project.

01/02/2023, 09:47 - : Terrick Hubbard

Jhb

01/02/2023, 09:47 - :

02/02/2023, 13:12 - WSP: <Media omitted>

03/02/2023, 14:26 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 14:26 - : I'd like to object.

03/02/2023, 14:26 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 14:28 - : Weber Janse van Rensburg

I object to Total energies or anyone else drilling oil in the oceans off of South Africa. These pristine waters are migration routes for whales and dolphins and are home to so many species of aquatic animals. Oil companies have traditionally not been trustworthy with regards to prevention and clean up of oil spills. How do you clean oil out of the ocean any way? These areas are used by fisher people to harvest food and ecotourism brings in much income to the area. Both of these and many more economic fields would be threatened merely to being more income to multinational shareholders. This at a time when climate change is threatening our economies and human life in such a devastating manner. I object on these grounds and many more

06/02/2023, 09:23 - WSP: Thank you for your submission to the Scoping process of the TEEPSEA Block 11B/12B ESIA . Section 42(a) of the EIA Regulations (2014), as amended, under which the ESIA is being conducted, stipulates that all persons that have provided comment are included in the register as an Interested & Affected Party (I&AP).

If you do not wish to be registered as an I&AP, kindly respond to this email requesting removal from the register. If you remain on the I&AP database, your comment will be included in the project Comment and response Register for consideration in the Scoping process.

03/02/2023, 13:35 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 13:35 - : Please register me as an I&AP for the Total Energies EIA for the project between Mossel Bay and Cape St Francis.

I have only just become aware of this matter, and as a South African citizen I am deeply concerned about the influx of applications for prospecting and plans for resource extraction along our entire coastline. Whilst each project must be considered in its own context, it is my feeling that the cumulative effect of so many applications/projects MUST be considered by the decision-making authorities as a priority, as each project can and will have knock-on and wider impacts than anticipated. The fact that our marine resources are already stressed by human interventions, abuse and mismanagement, as well as the long-term climate change issues which we will be dealing with for generations to come, requires that any and all applications must be scrutinised, researched and assessed far more carefully than ever before, so as not to exacerbate an already dire state of affairs.

Please forward all information documents to me per email, so that I may understand the scope of the proposed work, in order to participate in the process meaningfully.

Name: Katrin Visser

Cellphone no. :

02/02/2023, 19:49 - : I object in the strongest terms to any new oil and gas exploration of the SA coast. With the world's available oil and gas reserves more than sufficient to meet demand until the COP 'zero emissions by 2050' cut off date. Besides our neighbors have more than enough to supply SA, a position which encourage bilateral trade and increased regional stability. Nick Yell

02/02/2023, 19:49 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 11:10 - : I am vehemently objecting to the licensing of Total Energies because there is a strong economic, social, and ecological argument globally against any activity that endangers our local and global ecosystem. Seeking to exploit an energy source whose time has already past is self destructive and damaging to ALL LIFE. If granted, this license will further destroy the viability of living things and our planet. It is shortsighted and serves to benefit only a few. This pipeline, if laid, will have a direct negative impact on the delicate whale populations that migrate through these waters. It's unthinkable and I must not go ahead. For all our sakes.

Very concerned citizen

02/02/2023, 14:46 - : I have the following comments to make regarding this proposed project and/or the public participation process:

My full Name: Julie Anderson

My email address:

My contact Number:

Referring to the TEEPSA Block 11B12B scoping public meeting presentation from the website <https://www.wsp.com/en-za/services/public-documents>

1. Proximity to sensitive areas

There are two unexplained (greenish) colours in the key of the maps pages 11 and 64 of the

The platforms and existing wells are conveniently placed and grouped where these areas briefly part.

The block proximity is bordering on ie touching critical biodiversity areas with proposed exploration areas marked well into critical areas.

Whaling information from 1960 cannot possibly give us the information we require to indicate that the the two marine mammal species identified will be the only two most affected. Also The list of threatened, critically threatened and near extinction species (pages 56-59 and page 53) is far too large to even consider allowing for any further exploration and or proposed production for the block under application and scrutiny. It would seem the block size has been determined by the sensitive areas that have been studied and borders (as in touches) these areas. The sensitive areas are marine areas and therefore cannot be subjected to a walled pool that will restrict movement, overlapping WILL occur and the entire block is simply too close to consider granting licenses.

Any and all of these marine protected and critical biodiversity areas should be given a much wider birth and the environmental departments of the government should not allow licenses to even begin processing if they fall within these areas. This is therefore the fault of the department responsible for marine protection to entertain and allow the applicant to further the process of applying. This would have saved the applicant and their predecessors billions of rands. The applicant could possibly lawfully argue that damages be paid by that department and also implicated is the department of energy and minerals as they signed off on the surveys supplying the data to the petroleum industry.

Every aspect of the area under consideration is fragile ecologically. It is widely known that disturbance in the ecology has DIRECT impact on communities reliant on ocean resources. It is also widely known that the population most affected is low income families who will be force below the poverty line. If this is acceptable to the Chairman, executives and shareholders of Total Energies then they should definitely proceed. It the notion that what they need in order to profit in any way has any affect as dire as poverty on any single family seems preposterous to the Chairman, executives and shareholders of Total Energies then they should abandon this application.

2. The unlawful seismic information gathered illegally in December 2021-2022 as well as all surveys that happened prior should be confiscated and not allowed to be used as part of the production process. It should be wiped from all memory and if exploration is what they need to confirm their suspicions that oil and gas exist there then they need to reapply to survey. The illegal seismic surveys cannot be reversed, the damage was done and future impact unknown but conveniently presumed to have none by the entire oil and gas industry.

3. What is so concerning is that rather than have a fully documented well presented safe and secure environment presentation, each new applicant for this block modifies their EIA based on the pushback they receive from the small

(gaining momentum) environmentally concerned groups who relentlessly battle the giants of oil and gas. With most recent wins as court battles and the largest national environmental protest campaign encouraging concerned people of the country and the world the voice to say and then to stop further damage to the vulnerable environment heading for climate disaster.

4. Thank you for hearing the outcry and stopping the process (Regardless that it was by force of court order and not voluntary) this has allowed the applicant to obtain the necessary information to appease the affected parties. Undoubtedly Total energies were expecting an outcome in their favour but the more new applicants research the area, the more evident it is that this should definitely NOT proceed any further then it already has.

5. I propose the department of environment, forestry and fishery should immediately apply to have the now well researched area declared a world heritage site. Therefore no single other applicant will be allowed to consider to apply to any interfering activities listed in the table on page 67 ever. In fact I would go so far as to propose it be named the Total Energies Marine conservation area. (As a token of appreciation for all the environmental data made available in the process)

6. The application was not for nought, the push back from I&AP allowed for further studies and investigation. We could possibly see the marine protected areas of south africa increase considerably which will look like a win to the government departments concerned. It will be well received by the global community and demonstrate willingness to listen to citizens and protect the environment and most vulnerable coastal communities.

02/02/2023, 14:46 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name,surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

02/02/2023, 14:47 - : <Media omitted>

02/02/2023, 15:52 - WSP: Good day Julie,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 20:11 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 20:11 - : To whom it may concern, I Peder Christensen South African citizen living in Cintsá East object to the government allowing big oil and gas companies to destroy our oceans to seek for the purpose to get oil and gas. This had a huge negative impact now and for the next generation that has no voice now. We can't live in the now but for Tey future of our ocean/nature. This is NOT the solution. The ocean does not belong to the government. It belongs to nature. It might be the easy answer now with the benefit to fill our corrupt government pockets but it will be the end to life in earth. We cannot damage the ocean as it serves us very well reducing corban dioxide and producing clean fresh air. We need oxygen more than oil and gas!! We have live centuries before without so why no now??

02/02/2023, 20:11 - WSP: Dear Stakeholder,

01/02/2023, 16:40 - : Attention:

Debbie (herein representing WSP - IESP for APPLICATION FOR BLOCK 11B/12B - REF No: 12/4/13 PR)

OBJECTION TO THE APPLICATION for any exploration and/or production by Total Energies and Partners, along the South African coasts Mossel Bay to Cape St Francis

1. I am an interested and affected party.
2. I object to the application for production rights, any exploration rights or any seismic surveying proposed by Total Energies and partners for the specified area now or at any time in the future.
3. The scoping report clearly recognises the coast of South Africa for its eco systems and clearly lists the appalling impact that their production will have on these systems, YET they will proceed if granted approval by Petroleum Agency SA
4. Any exploration and or production will negatively impact marine plant, bird and consequently human life. By the time full impact is known, irreversible damage is done.
5. The risks due to the course of such operations ie, leaks, spills, blasts etc, are too high to even consider risking one.
6. Total Energies and their Partners, relinquish all responsibility, financial or otherwise, that may arise in the explored blocks after they're done with production and have moved out. This becomes the responsibility of the SA government.
7. They get to leave all their equipment, material etc on the seabed because it's too costly for them to remove.
8. The "reasons " of benefit to the economy, contribution towards

alleviating the energy crisis, and job creation are fancy wrappings. The people and the environment are worse off in the long run. Corrupt politicians, greedy and manipulative wealthy individuals and corporations are the designed benefactors and beneficiaries.

Full Name: Faheemah Kolia
02/02/2023, 08:01 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

02/02/2023, 14:12 - : My name is Tony Lubner, Chairman of the ORCA Foundation in Plettenberg Bay. Its one Ocean and one block affects another block. I object to Totalenergies plan to drill new Wells and lay new pipelines off OUR coastline. 1. Our communities have not been consulted. 2. There is a history of uncontrolled irreversable damage to marine life and environment caused by oilspills related to these installations, with no clean up, no accountability, no compensation. 3. Most towns along this coastline are dependant on Tourism and one oilspill will mean disaster for thousands of people. 4. Following the precedent and court ruling against Shell, all our communities will continue to stand against Totalenergies to prevent foreigners from taking advantage of our land and its people.

02/02/2023, 14:13 - : My email

02/02/2023, 15:25 - WSP: Good day Tony,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

03/02/2023, 12:55 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 12:55 - : I am vehemently objecting to the licensing of Total Energies because there is a strong economic, social, and ecological argument globally against any activity that endangers our local and global ecosystem. Seeking to exploit an energy source whose time has already past is self destructive and damaging to ALL LIFE. If granted, this license will further destroy the viability of living things and our planet. It is shortsighted and serves to benefit only a few. This pipeline, if laid, will have a direct negative impact on the delicate whale populations that migrate through these waters. It's unthinkable and I must not go ahead. For all our sakes.

Very concerned citizen

I object to Total energies plan to drill and build along our South African coastline. I have seen the carnage that this kind of exploration and activity can visibly negatively affect the ecosystems that live there. I'm turn, it's the people who live along the coast that suffer. Money money money - that's all we care about - it's just paper!!!But here we are killing, plundering, destroying ...all for money but in the end we as a species are left poorer with the damage we're doing.

I vote against Total Energies and I would like more information on the agreement our government is considering.

No!

03/02/2023, 08:52 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 08:55 - WSP: Good day, my name is Joan Gallagher and I want to object to any oil or gas exploration. It is ridiculous that at this time when we are supposed to be moving away from fossil fuels that people think that they can explore and damage our coastline, taking away the livelihoods and the beauty and magnificence that we have been blessed with in their never ending greed, they are disgusting and need to be stopped.

03/02/2023, 08:56 - WSP: Good day Joan,

Please kindly confirm that I have captured your comment correctly.

03/02/2023, 10:20 - : Joan Gallagher

02/02/2023, 16:30 - : I hereby lodge my OBJECTION to TotalEnergies's plan to drill new wells and lay pipelines in the area between and offshore from Mossel Bay to Cape St Francis.

My objections: a blowout, accidental release or spillages will be catastrophic to marine life plus the regional industries of tourism, fisheries and recreational industries; offshore oil and gas exploration has a major negative impact on green gases and hence climate change, and more desirable and viable energy alternatives have not been fully considered. Deep water coral beds will be smothered by operational waste. Fish spawnings will be negatively impacted by toxic waste and emissions. CSEM surveys pose a risk to elasmobranch species (incl sharks, rays, skates). Noise and pressure emissions impact negatively and widely on marine turtles, mammals and cetaceans.

Joanne Macgregor sector: concerned citizen

02/02/2023, 16:30 - WSP: Dear Stakeholder,

03/02/2023, 11:25 - : Good Day WSP,

My name is:

Dean Knox

Director of a beach based tourism and eco-adventure company operating on the Eastern Cape Coastline.

Comments, Questions & Objections to planned production of Oil and Gas in block 11B/12B Mossel Bay -

International Oil & Gas Giants (Total Energies 45%, Qatar Petroleum 25%, Canada Natural Resources 20% and Main Street 1549 10%) are planning to drill new oil and gas wells (with rigs) between Mossel Bay and Cape St Francis.

I believe that Total and their partners already transgressed National Environmental Management Act (NEMA) when they seismically blasted the hell out of the area between Mossels and Seal Point (19000 square km) during 2019.. without Environmental Authorization from DFFE, but instead from DMRE based on an EMP and not an EIA as required for such activities. Total should be punished for the damage which they have already caused, not benefitting.

They already know that the Outeniqua Basin has a huge oil reserve with ESTIMATED VALUE OF 1 Trillion US Dollars.. as much tax collected for the fiscus in SA over the last 15 years added together.. "The Brulpadda" Oil Reserve as they nicknamed it. Very few South Africans stand to benefit GREATLY!!! (Only Phutuma Nhleko and Johnny Copelyn will really benefit), but at a huge environmental cost.

The "Save the Wild Coast" judgement against Shell & Impact oil and gas was just one battle won. These guys are relentlessly greedy. They have a lot of money and together with their politically connected cronies are hell bent on getting their greedy hands on the big fat "Brulpadda" pay cheque, no matter the cost to the environment, harm to marine life, fish stocks, coastal communities and global warming emissions reduction targets.

There is a huge risk to the entire coastline as we have particularly rough seas and strong ocean currents along this coast. A significant spill or accident and the oil will be spread up and down the entire coastline due to the fast southward moving Agulhas Current (4m/s) and northward Longshore drift caused by sw winds and marching swells.

This project should not be seen in its individual capacity and threat thereof but rather consider the cumulative effect of all of the fossil fuel extraction plans for the entire coastline and exclusive economic zone of South Africa as there are many similar projects with right held by other international companies. EIA'S should consider the impact of the cumulative effect of all of these operations should permissions be granted.

The Oil & Gas Companies and Political Royalty are following Churchill's advice to, "Never let a good (energy) crisis go to waste". There is a 'Gas Master Plan' that includes Karpowerships, exploiting oil, gas and mineral deposits along the entire 3000km coastline and up to 240km out to sea.

This is short sighted as the extraction is short term and will benefit very few South Africans, while the risk to the ecological integrity is great. A pristine coastline is part of our natural heritage as South Africans and is enshrined in the constitution. We also have a responsibility to preserve this natural heritage in a sustainable way for the benefit of present and future generations as outlined in our constitution. The extraction of oil and gas for short term financial benefit to mostly international companies is not in line with the South African Constitution.

Welcome to the economic colonialism of the 21st century.

Another assault on the sacred South East Coast of Africa.. the whales' oldest sanctuary and corridor connecting the Southern Ocean to the warm water breeding grounds of the Indian Ocean. Home of The Sardine Run the Agulhas Current - one of the Oceans' strongest currents and "superhighway" which is critical for migration of breeding whales

and most other species.

Regards

Dean Knox

03/02/2023, 11:25 - WSP: Dear Stakeholder,

09/02/2023, 15:20 - : I am an interested party because South Africa is a beautiful country. We need to seek alternative and renewable sources of energy.

We need to protect nature, safeguard natural resources and take forward the movement towards Just Transition, in the right direction.

The Total Energies Plan could destroy major sections of one of the most beautiful places on the planet, and destroy livelihoods that depend upon nature and fish stocks, the picturesque and rich Garden Route.

It is with shock and horror to see the disregard by Total Energies and Shell against the preservation of natural resources and tourism value of The Garden Routh and the Wild Coast.

They must be stopped from what they are doing and find another way.

The leadership at Government Department must also be changed urgently towards more competent people who have the future of South Africa's natural resources and the people who are building a future and investing in a clean and unpolluted life, a life of thriving and not just surviving.

The leadership needs to lead the way to a Just Transition not led by money or greed, a future led by educating people, improving communities, and creating awareness about taking care of the planet.

09/02/2023, 15:20 - : Garika

02/02/2023, 10:29 - : Joy Nita Orton

Concerned Citizen

I totally object to Total putting a gas pipeline in the middle of an oceanic migration route.

This is totally unnecessary and obviously been punted as it will fill the coffers of a select few who care not one iota for the sea creatures, livelihoods and tourism of our beautiful country.

AN END TO ALL THIS CRAP MUST HAPPEN NOW...

IT MUST STOP.

IN THIS DAY AND AGE , HAS NOBODY LEARNED ANYTHING...AS A PEOPLES, WE ARE DEGENERATING AT A RATE OF KNOTS because of corruption which is obviously at the core of this heinous proposition.

END THIS RUBBISH Now!!!!!!

Fire everybody involved in Government. They are a disgrace to the nation.

02/02/2023, 11:55 - WSP: Good day Joy,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

I object to more offshore oil and gas drilling in our precious ocean, reason is, I'm a fisher living in a fishing community.

In the case of a disaster we will be tremendously affected, our livelihood WILL be at risk. In the past there has been many disasters that took place, to name a few:

○DEEP WATER HORIZON

○MUMBAI HIGH NORTH

○OCEAN RANGER

The list goes on...

There are no clean up plans in place and no compensation !!

How can you drill next to a marine protected area

Do you even consider the environment

Do you consider our livelihood

Do you consider our human rights

03/02/2023, 08:28 - WSP: Thank you for your submission to the Scoping process of the TEEPSA Block 11B/12B ESIA . 01/02/2023, 08:51 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 07:53 - : Dear Sir / Madam

Please register me as an interested party in the matter of Total's proposed exploration and drilling off the coast of Mossel Bay?

I strongly object to the exploitation and possible destruction of SA's natural resources.

Elize Taljaard

01/02/2023, 08:51 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

01/02/2023, 09:20 - : Elize Taljaard

Ocean lover, swimmer

01/02/2023, 09:38 - WSP: Good day Elize,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

Please note that your registration has been received and will be processed in due course.

02/02/2023, 08:00 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 18:06 - : Attention:

Debbie (herein representing WSP - IESP for APPLICATION FOR BLOCK 11B/12B - REF No: 12/4/13 PR)

OBJECTION TO THE APPLICATION for any exploration and/or production by Total Energies and Partners, along the South African coasts Mossel Bay to Cape St Francis

1. I am an interested and affected party.
2. I object to the application for production rights, any exploration rights or any seismic surveying proposed by Total Energies and partners for the specified area now or at any time in the future.
3. The scoping report clearly recognises the coast of South Africa for its eco systems and clearly lists the appalling impact that their production will have on these systems, YET they will proceed if granted approval by Petroleum Agency SA
4. Any exploration and or production will negatively impact marine plant, bird and consequently human life. By the time full impact is known, irreversible damage is done.
5. The risks due to the course of such operations ie, leaks, spills, blasts etc, are too high to even consider risking one.
6. Total Energies and their Partners, relinquish all responsibility, financial or otherwise, that may arise in the explored blocks after they're done with production and have moved out. This becomes the responsibility of the SA government.
7. They get to leave all their equipment, material etc on the seabed because it's too costly for them to remove.
8. The "reasons " of benefit to the economy, contribution towards

alleviating the energy crisis, and job creation are fancy wrappings. The people and the environment are worse off in the long run. Corrupt politicians, greedy and manipulative wealthy individuals and corporations are the designed benefactors and beneficiaries.

Full name: Fatima Adam , resident of Kleinkrantz, Wilderness, WC
02/02/2023, 08:17 - WSP: Dear Stakeholder,

Concerned citizen

The coastline is so precious and sensitive. We need to do everything in our power to protect it. I feel that this pipeline would seriously compromise the sea ecology. Please don't do it!

02/02/2023, 11:14 - WSP: Good day Colleen,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 08:00 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 18:20 - : I Carol Fox strongly object to the proposed latest plans for Total to drill the ocean for an oil pipeline etc off Mossel Bay & surrounds coastline. This is a serious threat to the Environment, sea creatures & Eco-Tourism. Please register my strong objection.

02/02/2023, 08:18 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 11:16 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 11:16 - : I am vehemently objecting to the licensing of Total Energies because there is a strong economic, social, and ecological argument globally against any activity that endangers our local and global ecosystem.

Seeking to exploit an energy source whose time has already past is self destructive and damaging to ALL LIFE. If granted, this license will further destroy the viability of of living things and our planet. It is shortsighted and serves to benefit only a few. This pipeline, if laid, will have a direct negative impact on the delicate whale populations that migrate through these waters. It's unthinkable and I must not go ahead. For all our sakes.

Very concerned citizen

01/02/2023, 10:34 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 10:34 - : I Deborah Cecile Pretorius, do hereby *object to Total's plan to drill and build new gas pipelines off Mossel Bay in the Outeniqua Basin.*

1. Lies in the middle of the Agulhus Current that is a major highway for Whale and Sardine migration.
 2. Borders on a Marine Protected area.
 3. Certain Government officials and their buddies stand to gain massively from the proposed x R8 billion annual income.
 4. Have you heard about Karpowership??
 5. Gas and Oil is a super high risk to the environment, tourism and other economic endeavors along coastline.
 6. Contribute to green-house gases and release of carbon stores of seabed sediment.
- etc etc

The ESIA being done by WSP (A consulting firm that consults both on environmental and oil and gas drilling industry - conflict of interest much?) *has been snuck through the eastern Cape and ignored the greater Western Cape.*

*The most terrifying thing is if this is allowed, it will open our entire coastline to oil and gas companies and we will be sitting in hearings for possibly decades to come.

#totaldestruction

#totalfallacy

#totallyunforgivable

agriculture & hospitality

Thank you

01/02/2023, 10:10 - WSP: Good day Rian,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 08:00 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

01/02/2023, 16:24 - : Good day.

I attended the hearing in East London on the 26th and wish to resubmit my comments and objections in case they were not recorded properly:

I Lisa Cloete, as a private individual who serves as one of many stewards of the ocean object to the building and mining of a gas pipeline in the Outeniqua Basin, Block 11B/12B by TotalEnergies on these grounds:

- It is clear any research taken or done on the existing Mosgas Pipelines have not been taken into account for this pipeline, if even done at all. This shows a lack of due diligence on the most obvious potential environmental and social impacts. It can also take decades to acquire adequate data, particularly on Ocean heating/ acidification and the release of carbon through disturbance on the seabed, all which don't just impact environments but global warming. We cannot take any risks on this and therefore do not want these mines in our ocean.

- We do not feel that of the 14 million people on our coastlines that there has been adequate public engagement around this very important and potentially disruptive mining. Particularly by indigenous groups.

- We understand that TotalEnergies has an intention to be net zero by 2050. We object to last minute mining and suggest an investment in real green energy solutions that are sustainable and non-invasive.

We object fully to the industrialisation of our wild and living ocean.

Thanks, we will see you at the next round of hearings.

Lisa

01/02/2023, 16:37 - WSP: Good day Lisa,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

01/02/2023, 16:38 - WSP: Please kindly provide us with your email address and contact number for us to register you as an Interested and Affected Party for the Block 11B/12B project.

Individual

02/02/2023, 11:59 - WSP: Good day Tanya,

Thank you for your comment. It will be captured in the comment and response report and submitted as part of the Final Scoping report.

02/02/2023, 11:59 - : Thank you

02/02/2023, 21:35 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

02/02/2023, 21:35 - : My name is Mikyla Pearson

(Contact number: & Email:) and I'm writing as a concerned citizen over TotalEnergies plan to drill new wells and build new pipelines in the 12000sq. Km area between Mossel Bay and Cape St. Francis.

1. A major concern is that the proposed projects lies in the middle of the Agulhus current which is a major highway for whale and sardine migration every year. Oil spills are catastrophic to the environment and wildlife and unfortunately as events have proven in the Niger Delta, projects of this magnitude cannot succeed in poverty driven countries without disastrous accidents occurring. Just last month in December, the beaches here in the Garden Route were closed because oil was found on beach goes hands and feet, there was an apparent "investigation" but are still waiting for that outcome, so no body is held accountable and our vulnerable oceans are left to suffer for the greed of this government. PetroSA, like many of SA's state-owned entities such as Eskom, have proven to be riddled with corruption and incompetence. This could dramatically increase the likelihood of serious accidents enormous long term damage to the coastline environment and knock-on effect on small-scale fishers, Local tourism and other businesses - this is a risk we cannot afford to take. A Totalenergies spokesperson stated that after a serious accident, the SA government will investigate (still no feedback from the December Mossel Bay oil spill) and TotalEnergies will be responsible for compensation. Well once the damage is done compensation pointless because the condition of our beautiful natural environment will be irreversible.

This project will not benefit the people of SA but rather Gwede Mantashe's wallet and other government officials.

2. Only certain government officials and their friends stand to gain massively from the proposed project. As per our constitution, the coastline belongs to all of us, for present and future generations, but TotalEnergies' project offered only finite development, not long term sustainable development. The jobs associated with the project involved working deep underwater on gas well construction or on the rigs or flying helicopters which require people trained in a high level skills overseas, meaning Local people would not be eligible for the jobs.

Regards

Mikyla Pearson

02/02/2023, 21:35 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Thank you.

03/02/2023, 12:35 - WSP: Dear Stakeholder,

Thank you for contacting WSP's Public Participation Office

Please kindly provide us with your full name, surname, contact number, email address and the sector you represent for us to register you as an Interested and Affected Party for the Block 11B/12B project.

03/02/2023, 13:04 - WSP: Thank you for your submission to the Scoping process of the TEEPSEA Block 11B/12B ESIA . Section 42(a) of the EIA Regulations (2014), as amended, under which the ESIA is being conducted, stipulates that all persons that have provided comment are included in the register as an Interested & Affected Party (I&AP).

If you do not wish to be registered as an I&AP, kindly respond to this email requesting removal from the register. If you remain on the I&AP database, your comment will be included in the project Comment and response Register for consideration in the Scoping process.

03/02/2023, 17:56 - Messages and calls are end-to-end encrypted. No one outside of this chat, not even WhatsApp, can read or listen to them. Tap to learn more.

03/02/2023, 17:56 - : I would like to register my utter dismay and alarm that Total Energies plans to mine gas off Mossel-bay in zones 11B and 12B.

It is inconceivable that we plan new fossil fuel projects in the face of climate emergencies we are already living through. As an interested and affected party, please register my disgust and total lack of support for the project.

It will benefit only those with their hands in the fossil fuel pie. No South African will benefit.

Shame on Total for adding to the collapse of our coastal communities.

Signed EJ Styles.

03/02/2023, 17:56 - WSP: Dear Stakeholder,

02/02/2023, 09:13 - : I would like to register as an interested and affected party and object to Total's plan to drill and build new gas pipelines off Mossel Bay in the Outeniqua Basin. I am concerned about the impact on the Agulhus Current that is a major highway for Whale and Sardine migration.

It also borders on a Marine Protected area which could be severely impacted by any spillage.

I have no confidence in the government's ability to maintain such a pipeline or effectively manage any disasters.

The ESIA being done by WSP has been snuck through the Eastern Cape and ignored the greater Western Cape.

Until we can be sure of the impact on our irreplaceable natural environment, we should not go ahead with this project.

Regards, Caroline Kruger ID

02/02/2023, 11:23 - WSP: Dear Stakeholder,

03/02/2023, 18:15 - : I am vehemently objecting to the licensing of Total Energies because there is a strong economic, social, and ecological argument globally against any activity that endangers our local and global ecosystem. Seeking to exploit an energy source whose time has already past is self destructive and damaging to ALL LIFE. If granted, this license will further destroy the viability of living things and our planet. It is shortsighted and serves to benefit only a few. This pipeline, if laid, will have a direct negative impact on the delicate whale populations that migrate through these waters. It's unthinkable and I must not go ahead. For all our sakes.

Very concerned citizen

Mrs Holly Barnes

03/02/2023, 18:15 - WSP: Dear Stakeholder,

01/02/2023, 15:42 - : I object objection to gas pipelines being built or gas extracted off the coast of Mossel Bay!

I question of ESIA consultants independence, the fact that the pipeline will be run by PetroSA once itâ€™s up and running is frightening! The government has run most of its institutions into the ground and so will this be any different. There are so many ways that this project can go wrong from the oil/gas spilling into the Augustus current, to corruption to lack of jobs for small scale fishers.

01/02/2023, 15:43 - WSP: Dear Stakeholder,

02/02/2023, 21:24 - : Hi there.

My name is Aaron-Luke Rielly and I'm writing in as a concerned citizen over TotalEnergies' plan to drill new wells and build new pipelines in the 12000sq. Km area between Mossel Bay and Cape St. Francis.

Some of my major concerns are that the southern and Eastern coastline of South Africa has an incredible diversity of marine life with whale migrations from Antarctica to Mozambique and the annual sardine run which supports an array of local economic opportunities. This could all be put at risk by major accidents and other damage from TotalEnergies' project. The ministry who decides upon the environmental management plan is the Dept of Mineral Resources and Energy, not the Dept of Environment, Forestry and Fisheries who actually have the proper expertise. What is really needed locally is small scale community energy development in renewable, including solar and wind projects run by local communities who would benefit directly from the job opportunities, and that is what TotalEnergies should rather be investing in.

Regards

Aaron
