

Airport growth through a reimagined IT network

WSP USA provides expertise in improving passenger experience to meet growth goals for airports globally. WSP understands that in today's fast paced fully-connected mobile environment, technology leads the charge. WSP has proven real world experience integrating complex technology, predictive analysis tools, real-time information and data-sharing amongst a variety of stakeholders and entities, often with divergent needs and desired results for airports that want to increase traffic and grow revenue.

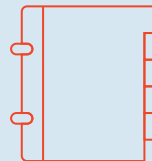

To deliver a system that meets your needs, WSP studies active infrastructure, service level agreements, tenant needs and overall operational function. We understand the airport market and cutting-edge technology and we have real world experience delivering these projects as a valued advisor to airports.

Enhanced and efficient passenger experience

Market leadership

IT network standardization

Revenue generation

PROJECT CYCLE

Developing a system that can support such a passenger experience is a unique exercise for every client. WSP's process for ensuring proper implementation includes:

- Developing a preliminary study and analysis
- Analyzing business options for revenue generation
- Developing expectations for day two management
- Implementation of engineering plan
- Defining a process to fully deploy the solution

NETWORK MODERNIZATION IN REAL TIME

PHL PHILADELPHIA INTERNATIONAL AIRPORT

To enhance the passenger experience, WSP is assisting Philadelphia International Airport and Northeast Philadelphia Airports with upgrades necessary to support smart phone applications and other technologies. This effort includes the renovation and upgrade of dozens of communications rooms, a new facility-wide neutral host DAS/WiFi program, new IT infrastructure, a plan for generating revenue streams from these services, a disaster recovery and off site co-location plan and updates to design standards for passive and active spaces.

WSP makes the right IT infrastructure possible.
