

Climate Finance

WSP works at the nexus of private investment and climate change, pioneering the fields of blended finance, climate finance, and resilience finance. The team is composed of bankers, private equity, and development finance practitioners with 150+ years of collective expertise. WSP advises public and private investors as well as governments and policymakers on how to accelerate sustainable, climate-resilient investments and understand and integrate climate considerations, and on how to effectively translate climate finance policy into practical action to deliver results.

WHO WE ARE

We are one of the world's leading professional services firms. Our 66,000 passionate people are united by the common purpose of creating positive, long-lasting impacts in the communities we serve through a culture of innovation, integrity, and inclusion. WSP's guiding principles foster sustainable reform through ensuring activities are contextually rooted, locally owned, inclusive, results-oriented, evidence-based, and collaborative. Our strength is our ability to adapt to shifting political economic contexts and evolving client needs.

DELIVERY CAPABILITY

WSP acquired Climate Finance Advisors (CFA) in early 2022 to accelerate sustainable, climate-aligned investment to the benefit of society, the economy, and the global environment. The CFA team has engaged on 180+ global/regional assignments in 40+ developed and developing countries with coverage spanning North America, Europe, Africa, the Middle East, Asia, and Latin America and the Caribbean. The CFA team's core work involves leveraging patient capital to increase private sector investments, capturing and scaling opportunities to accelerate climate-resilience investments, mainstreaming climate physical and transition risks into all financial decision making, and informing an organization's overall climate strategy and action.

RESILIENT INFRASTRUCTURE HIGHLIGHTS

MULTILATERAL DEVELOPMENT BANKS

Developed a climate change policy, including an implementation framework and 5-year climate action plan, with attention to mainstreaming policy in regional hubs and global practices.

INTERNATIONAL CLIMATE FUNDS

Mapped sources of international and domestic private capital (equity, debt, grants, and combinations thereof), public sources of climate finance, and donor capital to identify funding to capitalize a credit guarantee mechanism for a proposed green finance facility.

NATIONAL DEVELOPMENT BANKS

Created a framework and methodological guide outline for mainstreaming climate risks into the bank's project cycle and conducted training sessions to integrate climate change risk considerations into their financial decision-making process.

GREEN FINANCE INSTITUTIONS

Provided technical assistance, analyzing green finance products and loan portfolio's vulnerability to climate change and developing environmental guidelines and policies in support of Micro-, Small- and Medium-sized Enterprises (MSMEs).
